

FALCON FIELD CONSTRUCTION UPDATE Dec 12, 2011

Reconfiguration of Taxiway B and installation of runway guard lights is expected to begin Jan. 3 and continue through June 2012. The work may require occasional temporary runway closures, and FFTUA members are encouraged to watch for closure announcements on the Falcon Field website at http://www.mesaaz.gov/falcon_field/, our Facebook page at <https://www.facebook.com/#!/falconfieldairport> or Twitter at <http://twitter.com/FalconFieldAZ>

In addition, pavement improvements are planned to begin in early summer 2012 and continue through August, including reconstruction of asphalt, realignment and modifications to tie-downs, and upgrading pavement strength.

FFTUA members are cordially invited to drop into the Falcon Field Administration Office in the terminal building any time between 10 a.m.-5 p.m. Thursday, Dec. 15 to enjoy refreshments and good cheer at our Holiday Open House! Please join us!

I would welcome an opportunity to meet with you and any of your other officers, board members and general membership to discuss how the airport can better work with you to share information, promote Falcon Field and support pilot/tenant needs.

Thank you for your consideration on the postings, and happy holidays!
